

SOILLESS GROWING TECHNOLOGY

HANGING GUTTER GROWING SYSTEM FOR STRAWBERRIES & LEAF VEGETABLES

*The best system for improving yields in
Strawberry and Leaf Vegetable culture*

MAPAL HANGING GUTTER SYSTEM for Strawberries and Leaf Vegetables

THE ADVANTAGES

- High plant density. 1.8–2.2 plants per square meter
- Minimum substrate volume per plant.
- Good aeration
- Easy and effective spraying
- No contact between fruit, substrate or plastic
- Easy and convenient for picking

ASSEMBLY OF MAPAL HANGING GUTTER SYSTEMS

1. Fold along the crease marks.
2. Insert the p.p. container into the PVC drain collection gutter.
3. Attach the end drain section to the PVC gutter with the rivets provided.
